Adhesion of finishing

PULIZIA / Cleaning / Nettoyage

Per la pulizia ordinaria spolverare il rivestimento
in pelle con un panno bianco pulito, asciutto non
abrasivo. Per lo sporco secco spazzolare con
delicatezza utilizzando una spazzola con setole
morbide. Evitare il contatto con solventi, smalti,
vernici, colle. In caso di versamento accidentale
di sostanze oleose o bevande, rimuovere
delicatamente la macchia dalla superficie con
carta assorbente, evitando di fare pressione in
modo che lo sporco non penetri nei pori della
pelle. Successivamente con un panno pulito,
imbevuto di una soluzione di sapone neutro molto
diluito, strofinare delicatamente la macchia.
Asciugare immediatamente la zona con un panno
asciutto. Non asciugare la pelle alla luce del sole o
con l'asciugacapelli. Prima di utilizzare qualunque
prodotto di pulizia verificarne l'effetto su una zona
nascosta.

For the normal cleaning, dust the leather coat with
a non abrasive dry clean white cloth. To remove
dry soilings, brush gently with soft brush. Avoid
contact with solvents, nail-polish, paints and glue.
In case of accidental contact with oils or liquids,
gently remove the spot from the surface with an
absorbent paper, avoid pressure that would make
the liquid penetrate into the leather pores. Then
with a clean cloth and a diluted solution of water
and soap, gently rub the spot. Dry immediately
with a dry cloth. Do not dry the leather by
exposing it to the sun light or by using a hairdryer.
Before using any cleaning products, verify the
effect in a hidden area.
