

Shoe cabinets

Space

A simple and precise design for a minimalist tall shoe cabinet, only 16 cm deep. The rest is design. Strict lines, a delightful metal handle and textured finishes to match the fronts or replace with mirrored doors. Because Space is not only comfortable to use, but also expand its functions and space: it finds centimetres for shoes even where there seemed to be none.

SPACE-SAVING SLIM SHOE CABINET

A minimalist shoe cabinet like Space is the result of a design created for small spaces to be used to the very last millimetre without sacrificing style. The result is effectively achieved thanks to its space-saving depth of only 16 centimetres. Its units can accommodate one or two rows of shoes and create furniture with three, four or five flap doors. Space can be used as a hanging column, floor-standing or with feet.

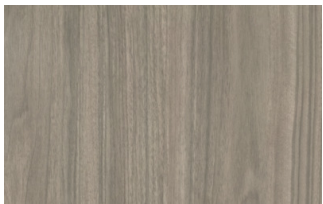

FINISHES

The Space minimalist shoe cabinet is practical and can be fitted into every environment thanks to the numerous finishes selected by Birex. Discover them all.
