

MARBLES

Millennial raw material of art, architecture and furniture, marble takes its name from the ancient Greek marmaròs which means “shining stone”, and comes in numerous variations of color and texture.

Bolzan has selected four different types of marble, each with its own aesthetic personality, to create tops for bedroom furniture and tables ideally coordinated with the other finishes of the collection.

The prestige of the material goes hand in hand with the quality of the workmanship, with an always impeccable result.

bardiglio

LACQUERED

In the Bolzan collection, a carefully curated selection of lacquered shades allows for the coordination of all key elements in the sleeping area, in harmony with every aesthetic style and design choice.

The same RAL colors are applied to wood, MDF, or metal surfaces—for both bed frames and accessories—creating consistently perfect combinations.

In addition to our standard range, custom painting with a RAL color of your choice is available upon request to satisfy any specific need or desire.
